

/HGF SCHOLARS 2020

We are hugely grateful to all staff members at HGF Limited for their significant contribution to In2scienceUK and our mission to support young people from low income backgrounds. Every year thousands of young people apply to take part in the In2scienceUK programme and sadly we are unable to support all of them. However, with your help, we have been able to increase the number of young people from low income backgrounds supported this year. HGF Limited is advancing social mobility, diversity and inclusion in STEM and IP. In2scienceUK are proud to be partnered with organisations such as HGF Limited that promote greater equality in society.

Francisco

In2scienceUK gave Francisco the opportunity to gain knowledge from experts virtually. "The programme allowed me to enhance my understanding of many engineering disciplines from my own home."

Manav

In2scienceUK was an opportunity for Manav to apply his knowledge to genuine examples of sciences. "My highlight was a lecture on nanobodies with the potential for it to work as a 'magic bullet' treatment for cancer."

Subhana

Subhana decided to take part in In2scienceUK to explore STEM careers, especially in maths and computer science. "I heard plenty of good tips from people who are specialised in their fields and love what they are doing."

Rohan

In2scienceUK allowed Rohan to gain invaluable insights into a career in research. "Meeting researchers from a variety of backgrounds, made the prospect of working in science seem more achievable and desirable."

Manujaa

Manujaa loved having the opportunity to ask questions to passionate researchers. "In2scienceUK allowed me to explore a wide range of areas in STEM in an enjoyable and accessible format."
